PLANTING THIS FALL IS CHEAPER AND GIVES BEST RESULTS

QUALITY GRASS SEED

*A Beautiful Lawn
adds to the charm of
your home*

**TO MAKE
A GOOD
LAWN**

IT'S ECONOMICAL TO BUY GOOD GRASS SEED

Inferior seed is costly in the long run. Spring Hill offers only the better grades of seeds at moderate prices.

Late summer and early fall is the ideal time for renovating; re-building or making a new lawn. The cool moist weather makes the grass grow fast and it stools or spreads out better than any other time of year. Weed seed likes the warm weather and does not sprout until Spring for the most part. **PLANT NOW FOR BEST RESULTS.**

Sow seed from early September to late November when the ground is moist. A well prepared seed bed is essential, so work your soil thoroughly six to eight inches deep. Add humus to heavy soils. Good seed is important and economical. Sow 1 pound of seed to 200 square feet of lawn; if soil is dry after sowing be sure to sprinkle. Mow as soon as tall enough, as mowing makes the plants stool out. If soil is not the best, fertilize with turf builder and reseed any bare spots. Spring Hill's seed formulas are dependable and reliable. They are the results of many years research and are blended from the World's most choice grasses.

FANCY KENTUCKY BLUE GRASS Our most dependable and hardiest, easy to grow variety. Recommended for reseeding old lawns and pastures. It is economical to buy finest weed-free germinating seed. 1 lb. 60¢; 5 lbs. \$2.85; 25 lbs. \$12.50; 100 lbs. \$45.00.

SPRING HILL'S SHADY LAWN MIXTURE For areas where lawn has less than six hours of sunlight. A special blend of best shade loving grasses which grow well with little moisture, little sunlight and poor soil. 1 lb. 85¢; 3 for \$2.40; 10 lbs. \$7.95.

SPRING HILL'S DELUXE EVERGREEN MIXTURE Exceptionally high quality rated as one of the three finest mixtures in America. Highest germinating fresh crop seeds with more seeds per pound and practically no weed seed or inert matter. This famous blend is the result of years in testing formulas. TO PLANT ROSES IN THE FALL Follow simple directions in picture and you will succeed with our hardy roses and enjoy an abundance of bloom. A well drained soil is essential. With heavy soils adequate drainage should be provided. Plant below the bud or where branches start. This is usually about 2 inches deeper than they grow in the nursery row. After planting, mound up about 6 inches high around top of plant. Cut off top of rose bushes 1 or 2 inches above top of mound. Remove mound of soil in late spring when new growth has started and danger of frost is past. Fall planting assures an abundance of blooms early next spring and we like fall planting where plants are protected in preference to spring planting. Plant roses in bed 18 to 24 inches apart in alternate rows. Water well when planting.
